DONROAD

SPHERASTEK GLASS BEADS

„Spherastek“ glass beads are made from 100% recycling glass. Due to the special production technologies, Donroad can produce glass beads up to 1.1 mm.

For road marking business, we achieve a very good night visibility with an innovative coating technology and the high quality of our glass beads.

This advantages pay off also for the applications of the glass beads as blasting media or filler.

PREMIX

DROPON

BLASTING

FILLING

FIELDS OF APPLICATION

Advantages:

- Wide range of glass beads available
- Optimized coatings ensure good adhesion in combination with high durability and long term reflection

Advantages:

- Usage of 100% float glass ensures high performance
- Multi functional coatings ensure a wide field of application on different road marking materials with the same glass beads
- Roundness of up to 95% gives you more performance

Advantages

of glass beads as blasting media:

- Precise and smooth surface treatment
- Multiple usage possible
- Easy to recycle

Advantages

of glass beads as filler for compounds and polymers:

- Increase of the surface smoothness and scratch resistance
- Improvement of the viscosity of the compound while application
- Optimization of stress distribution in all directions

SPEZIFIKATION

Standard sizes:

63-212 700-1100
106-600
180-850
425-850

Coating:

- adhesion
- waterproof
- UV

Standard sizes:

63-212 425-1100
106-600 700-1100
180-850
425-850

Coating:

- adhesion
- waterproof
- UV

Standard sizes:

40-70 150-250
70-110 200-300
90-150 300-400
100-200 425-850

Standard sizes*:

0-50
40-70

Coating*:

- amino-based
- epoxy-based

*further coatings on request

PACKAGING

- 25kg paper bags
- 250kg, 500kg, 1.000kg bigbags

CERTIFICATIONS

- ISO 9001:2000
- CE
- GoStR
